SignUp4 Releases the Travel Management System™ (TMS)

Atlanta, GA, June 1, 2007. Based on the input of key customers and a clear need in the meetings and event industry, SignUp4 has just released the Travel Management System™ (TMS). TMS works hand in hand with SignUp4's industry leading Event Management System™ (EMS) and allows meeting planners to automatically match travel itineraries (PNRs) with event registration records. Unlike currently available solutions, TMS connects directly to the GDS thus eliminating the need to always make reservations through a corporate booking tool or gather data from a third party. Utilizing SMS improves efficiency, accuracy, and results in substantially lower transaction fees.

"In the past, meeting planners wishing to see a combined view of meeting attendees and their travel details had to do a good bit of manual work and data entry", says Nick Romano, President of SignUp4. "SignUp4's Travel Management System allows planners to easily pull accurate travel manifest reports, see who has not booked travel at any point in time, and manage virtually any segment type booked through the GDS, helping to eliminating costly mistakes."

About SignUp4

Headquartered in Atlanta, GA, SignUp4 continues to be the leader in providing meetings technology solutions since its inception in 1999. Their Strategic Meetings Management suite is designed to streamline event management, spend management, travel management, workflow, data distribution, and reporting for travel and event professionals.
